Download

The Cisco ASA RDP clientless SSLVPN can easily be a popular feature for business. The Cisco ASA RDP clientless SSLVPN Server provides enterprise services that include, but are not limited to; Remote Desktop Services (RDS) and remote access. In the following section we'll be going through how to configure Cisco ASA RDP Clientless SSLVPN using RDP Plugin. Before we start, we'll need to make sure that we have the correct pre-requisites installed on the ASA. For this tutorial, we'll use an ASA 5510 model. Pre-requisites First of all, you'll need the following, installed in the ASA: Third Party RDP Plug-in SASL RDP The RDP Plug-in is available on Cisco's website (for download); in the Administration Tools section. The following video shows you how to configure the RDP Plug-in on the Cisco ASA. Configure RDP Plug-in on ASA The RDP Plugin supports the following modes, which is indicated in the feature configuration below; Enabled Disabled Pass through: Pass through is used when you want to create a new session on the client. The RDP Server will check whether a user exists on the remote machine or not. Advance: Advance is when you want to set up the connection between the clients and the server. The remote desktop session is based on the parameters passed through the URL. Step 1 – Enable the RDP Plugin Log into the ASA using "asa" as the user name, enter "enable" as the command. Step 2 – Configure the RDP Plugin Now we'll need to configure the RDP Plugin. Configure RDP Plugin Mode You will need to configure the modes that you want to support. You'll need to configure the following mode; Pass Through Advance Enable SASL support for RDP Plug-in: Step 3 – Configure RDP Plug-in Security Now we'll configure the Security settings of the RDP Plugin. If you wanted to use the VNC mode (usually used in small and home environments), then we'll configure 82157476af
